We shall examine the validity of 16 experimental designs against 12 common threats to valid inference. By experiment we refer to that portion of research in which variables are manipulated and their effects upon other variables observed. It is well to distinguish the particular role of this chapter. It is not a

chapter on experimental design in the Fisher (1925, 1935) tradition, in which an experimenter having complete mastery can schedule treatments and measurements for optimal statistical efficiency, with complexity of design emerging only from that goal of efficiency. Insofar as the designs discussed in the present chapter become complex, it is because of the intransigency of the environment: because, that is, of the experimenter's lack of complete control.

To really nail the Science section of the ACT standardized exam, you have to understand basic principles of science - experimentation, data collection, numerical and graphic data analysis, and how to develop conceptual conclusions. Who better to write the test prep book than an engineer who loves science? Michael Cerro uses his background as a chemical engineer, chess player, and highly-impactful ACT tutor with years of test prep experience to write a book that offers a new approach to ACT Test Prep rooted in: LOGIC. He brings together copious opportunities to practice with sample problems at each strategic lesson, using customized questions that feel just like the real test. Michael has an ability to create essential teaching moments on each page, as you walk through the book; and you may even have fun doing it! Above all, his love of the exam and of science ensure that anyone who uses this book - from teachers to tutors to students - will master the ACT Science section as well as gain a valuable understanding about the world of science that will be beneficial throughout life.
