Apache Spark
SparkSession: Prior to Spark 2.X, there were different entry points for

Online Library

Apache Spark 2

different Spark jobs; that is, for Spark SQL we had `sqlContext` and if Hive features were also

required then

`HiveContext` was the entry point. With Spark 2.X this ambiguity has

been removed and now we have one single entry point called

`SparkSession`. However, it is to be noted that all the module-specific entry

Online Library

Apache Spark 2

points are still very much around and have not been deprecated yet.

Apache Spark is an open-source distributed general-purpose cluster-computing framework. Spark provides an interface for programming entire clusters with implicit data parallelism and fault tolerance. Originally developed at the University of California, Berkeley's AMPLab, the

Online Library Apache Spark 2

Spark codebase was later donated to the Apache Software Foundation, which has maintained it since.
