Taking a long view of the three-party relationship, and its future prospects In this Asian century, scholars, officials and journalists are increasingly focused on the fate of the rivalry between China and India. They see the U.S. relationships with the two Asian giants as now intertwined, after having followed separate paths during the Cold War. In Fateful Triangle, Tanvi Madan argues that China's influence on the U.S.-India relationship is neither a recent nor a momentary phenomenon. Drawing on documents from India and the United States, she shows that American and Indian perceptions of and policy toward China significantly shaped U.S.-India relations in three crucial decades, from 1949 to 1979. Fateful Triangle updates our understanding of the diplomatic history of U.S.-India relations, highlighting China's central role in it, reassesses the origins and practice of Indian foreign policy and nonalignment, and provides historical context for the interactions between the three countries. Madan's assessment of this formative period in the triangular relationship is of more than historic interest. A key question today is whether the United States and India can, or should develop ever-closer ties as a way of countering China's desire to be the dominant power in the broader Asian region. Fateful Triangle argues that history shows such a partnership is neither inevitable nor impossible. A desire to offset China brought the two countries closer together in the past, and could do so again. A look to history, however, also shows that shared perceptions of an external threat from China are necessary, but insufficient, to bring India and the United States into a close and sustained alignment. that requires agreement on the nature and urgency of the threat, as well as how to approach the threat strategically, economically, and ideologically. With its long view, Fateful Triangle offers insights for both present and future policymakers as they tackle a fateful, and evolving, triangle that has regional and global implications.

This study reveals the hidden story of the secret book distribution program to Eastern Europe financed by the CIA during the Cold War. At its height between 1957 and 1970, the book program was one of the least known but most effective methods of penetrating the Iron Curtain, reaching thousands of intellectuals and professionals in the Soviet Bloc. Reisch conducted thorough research on the key personalities involved in the book program, especially the two key figures: S. S. Walker, who initiated the idea of a "mailing project," and G. C. Minden, who developed it into one of the most effective political and psychological tools of the Cold War. The book includes excellent chapters on the vagaries of censorship and interception of books by communist authorities based on personal letters and accounts from recipients of Western material. It will stand as a testimony in honor of the handful of imaginative, determined, and hard-working individuals who helped to free half of Europe from mental bondage and planted many of the seeds that germinated when communism collapsed and the Soviet bloc disintegrated.
