Concepts in Management Science: Donald J. Clough ...
Overview. Management science is concerned with a number of different areas of study: One is developing and applying models and concepts that may prove useful in helping to illuminate management issues and solve managerial problems. The models used can often be represented mathematically, but sometimes computer-based, visual or verbal representations are used as well or instead.

Management science - Wikipedia
Management science encompasses, however, more than just the development of models for specific problems. It makes a substantial contribution in a much broader area: the application of the output from management science models for decision-making at the lower, middle, and top management levels.
