How to get an electricity connection | Ofgem

Electrical Disconnect Switches. An electrical disconnect switch provides a means to shut off the power to a home's electrical system from an outdoor location. It is typically mounted below the electric meter, either on the side of a home or on the utility company's power pole. Not all homes have a dedicated disconnect.

...

The loads supplied by the electrical installation can be of various types depending on the business: motive power, variable control units, lighting, IT, heating, etc. Depending on the individual case, the electrical operating parameters (phase shift, efficiency, inrush transients, harmonics, etc.) will be different. The power to be considered is not limited to the simple reading of a value in watts.

Labour Costs and Timescales.
The average plumber will
usually charge around
£40-£60 per hour for their
work on fitting a power
shower. If it is an extensive
job, they may charge a day
rate which is usually around
£150-£270 per day.. The
installation of a power
shower can usually be
completed within a day;
however, it may take two
