

Hypergeometric Summation An Algorithmic Approach To Summation And Special Function Identities Universitext

When people should go to the book stores, search opening by shop, shelf by shelf, it is truly problematic. This is why we present the book compilations in this website. It will enormously ease you to see guide hypergeometric summation an algorithmic approach to summation and special function identities universitext as you such as.

By searching the title, publisher, or authors of guide you truly want, you can discover them rapidly. In the house, workplace, or perhaps in your method can be all best place within net connections. If you wish to download and install the hypergeometric summation an algorithmic approach to summation and special function identities universitext, it is utterly easy then, past currently we extend the associate to purchase and create bargains to download and install hypergeometric summation an algorithmic approach to summation and special function identities universitext thus simple!

Wolfram Koepf: Hypergeometric Summation. An Algorithmic Approach to Summation and Special Function Identities, Springer Universitext Series, 2014. XII, 253 pp., ISBN 978-1-4471-6463-0. Modern algorithmic techniques for summation, most of which were introduced in the 1990s, are developed here and carefully implemented in the computer algebra system Maple™.

Springer Universitext Series: Hypergeometric Summation

Modern algorithmic techniques for summation, most of which were introduced in the 1990s, are developed here and carefully implemented in the computer algebra system Maple™. The algorithms of Fassenmyer, Gosper, Zeilberger, Petkov & ek and van Hoeffj for hypergeometric summation and recurrence equations, efficient multivariate summation as well as q -analogues of the above algorithms are covered.

Hypergeometric Summation: An Algorithmic Approach to ...

In this book modern algorithmic techniques for summation, most of which have been introduced within the last decade, are developed and carefully implemented in the computer algebra system Maple. The algorithms of Gosper, Zeilberger and Petkovsek on hypergeometric summation and recurrence equations and their q-analogues are covered, and similar algorithms on differential equations are considered.
