This is the first encyclopedia to focus exclusively on the many aspects of the American beauty industry, covering both its diverse origins and its global reach. \* More than 100 entries cover many facets of the American beauty industry \* Over 40 contributors provide a variety of perspectives \* Some three dozen photographs capture various aspects of this pervasive industry \* Includes a chronology and a selected bibliography

The book uses the concept of the a oeManichaeana geography of the colony, popularized by Fanon, to account for the virulent Islamic renewal in Sudan. In focusing on the Sudan judiciary, characterized by an unrelenting rift between its civil and Sharia divisions, the book examines the various forces that sought to profit from these Manichaeian resources.

Over the last century, there has been a revolution in self-presentation and social attitudes towards hair. Developments in mass manufacturing, advances in chemical science and new understandings of bodies and minds have been embraced by new kinds of hairdressers and their clientele and embodied in styles that reflect shifting ideals of what it is to be and to look modern. The emergence of the ladies hairdressing salon, the rise of the celebrity stylist, the impact of

Hollywood, an expanding mass media, and a new synergy between fashions in clothing and hairstyles have rippled out globally. Fashions in hair styles and their representation have taken on new meanings as a way of resisting dominant social structures, experimenting with social taboos, and expressing a modern sense of self. From the 1920s bob to the punk cut, hair has continued to be deeply involved in society's larger issues. Drawing on a wealth of visual, textual and object sources, and illustrated with 75 images, *A Cultural History of Hair in the Modern Age* presents essays that explore how politics, science, religion, fashion, beauty, the visual arts, and popular culture have reshaped modern hair and its significance as an agent of social change.

A heavily illustrated history of two centuries of male beauty in British culture. Spanning the decades from the rise of photography to the age of the selfie, this book traces the complex visual and consumer cultures that shaped masculine beauty in Britain, examining the realms of advertising, health, pornography, psychology, sport, and celebrity culture. Paul R. Deslandes chronicles the shifting standards of male beauty in British culture—from the rising cult of the athlete to changing views on hairlessness—while connecting discussions of youth, fitness, and beauty to growing concerns about race, empire, and

degeneracy. From earlier beauty show contestants and youth-obsessed artists, the book moves through the decades into considerations of disfigured soldiers, physique models, body-conscious gay men, and celebrities such as David Beckham and David Gandy who populate the worlds of television and social media. Deslandes calls on historians to take beauty and gendered aesthetics seriously while recasting how we think about the place of physical appearance in historical study, the intersection of different forms of high and popular culture, and what has been at stake for men in "looking good."

Through compelling biographies of a wide range of historical figures, this engaging text presents a panorama of modern Chinese history that illustrates the great social and political changes that have occurred over the past 500 years. Through the lives of both the famous and the obscure, the contributors explore such enduring themes of the flexibility of the definition of "Chinese" in an era of imperialism and revolution, the tremendous transformations in gender relations, and the wide gap between the lives of urban and rural Chinese. Richly researched, these biographies are written in an accessible and appealing style that will engage all readers interested in modern

China.

Claudia Roesch offers a study of Mexican American families and evolving notions of masculinity and motherhood in the context of American family history. The book focuses both on the negotiation of family norms in social expert studies and on measures taken by social workers and civil-rights activists for families. The work fills gaps in research regarding the history of the American family in the 20th century, the history of Mexican Americans, and the history of social sciences. Taking a long-term perspective from the first wave of Mexican mass immigration in the 1910s and 1920s until the new social movements of the 1970s, the study takes into account influences of the Americanization and eugenics movements, modernization theory, psychoanalysis, and the Chicano civil-rights movement. Thus, Claudia Roesch offers important new findings on the nexus between the scientization of social work and changing family values in the age of modernity.
