GM Inline 4-Cylinder: 2.5 L (151 cid) and 3.0 L (181 cid); MerCruiser Inline 4-cylinder: 3.7 L (224 cid); GM V6: 4.3 (262 cid); GM V8: 5.0 L (305 cid), 5.7 L (350 cid), 7.4 L (454 cid), 8.2 L (502 cid)

The aim of this book, with its superb step by step photographs and detailed diagrams is to enable every owner to understand the workings of an outboard motor (2 or 4 stroke) and be able to fix it with relative ease. It includes: an explanation of the different parts that make up the engine and how they interact; how fuel is transformed into propulsion; regular maintenance and repair worksheets to help even the most mechanically ignorant to work on their outboard engine with confidence; the most common causes of breakdown; troubleshooting tables to allow you to diagnose and fix the most common engine problems and advice on how to winterize your outboard in one short afternoon. After reading this book, your outboard will no longer be a potential bother to you but an ally for better boating.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.
