One of our bestselling handbooks, The SAGE Handbook of Qualitative Research in Psychology is back for a second edition, with updated chapters and three new chapters introduced on Thematic Analysis, Interpretation and Netnography.

This handbook is a much-needed and in-depth review of the distinctive set of ethical considerations which accompanies qualitative research. This is particularly crucial given the emergent, dynamic and interactional nature of most qualitative research, which too often allows little time for reflection on the important ethical responsibilities and obligations. Contributions from leading international researchers have been carefully organised into six key thematic sections: Part One: Thick Descriptions Of Qualitative Research Ethics Part Two: Qualitative Research Ethics By Technique Part Three: Ethics As Politics Part Four: Qualitative Research Ethics With Vulnerable Groups Part Five: Relational Research Ethics Part Six: Researching Digitally This Handbook is a one-stop resource on qualitative research ethics across the social sciences that draws on the lessons learned and the successful methods for surmounting problems - the tried and true, and the new.

Spanning the full research process, from philosophy and ethics to design and methods and through data collection, management, analysis, and dissemination, this handbook focuses specifically on the practicalities needed to conduct effective and culturally responsive research in the Asian context.

The SAGE Handbook of Qualitative Business and Management Research Methods provides a state-of-the art overview of qualitative research methods in the business and management field. Bringing together a team of leading international researchers, the chapters offer a comprehensive overview of the history and traditions that underpin qualitative research in the field. The chapters in this volume have been arranged into four thematic parts: Part One explores the influential traditions underpinning qualitative research, such as positivism, interpretivism, pragmatism, constructionism and beyond. Part Two looks at research designs, covering ethnography, field research, action research, case studies, process and practice methodologies. Part Three focusses on the researcher: examining issues such as positionality, reflexivity, ethics, gender and intersectionality. Part Four examines challenges relating to research design, access and departure, choosing participants and more.

Qualitative research design is continually evolving. It is not only more established in disciplines beyond the traditional social sciences in which it is a standard choice, but also just as impacted by the changes in what data, technologies, and approaches researchers are using. This Handbook takes readers through the foundational theories, functions, strategies, and approaches to qualitative research design, before showcasing how it negotiates different data and research environments and produces credible, actionable impact beyond the study. Containing contributions from over 90 top scholars from a range of social science disciplines, this Handbook is not just an anthology of different qualitative research designs and how/when to use them; it is a complete exploration of how and why these designs are shaped and how, why, and into what they are evolving. This is a valuable resource for Master's and PhD

level students, faculty members, and researchers across a wide range of disciplines such as health, nursing, psychology, social work, sociology, and education. Volume One: Part 1: Concepts of Designing Designs in Qualitative Research Part 2: Theories and Epistemological Contexts of Designing Qualitative Research Part 3: Elements of Designing Qualitative Research Part 4: Basic Designs and Research Strategies in Qualitative Research Part 5: Mixing Methods in Designing Qualitative Research Volume Two: Part 6: Designing Qualitative Research for Specific Kinds of Data Part 7: Designing Qualitative Online and Multimodal Research Part 8: Designing Qualitative Research for Specific Groups and Areas Part 9: Designing Qualitative Research in Disciplinary Fields Part 10: Designing Qualitative Research for Impact
