Sony's latest line of so-called Bravia LCD flat-panels includes more than a few of high-end, bigger-screen models, including the subject of this review, the 46-inch KDL-46XBR2 (\$4,299).

Davie Jones—an ugly duckling growing up in small-town Mississippi with a mother who couldn't get any meaner—is positive her life couldn't be any worse. Just when she's resigned herself to her fate, she sees a movie that will change her life—Sixteen Candles. But in her case, life doesn't imitate art. Tormented in school and hopelessly in unrequited love with a handsome football player, Davie finds it bittersweet to dream of Molly Ringwald endings. When a cruel school prank goes too far, Davie leaves the life she knows and reinvents herself in the glittery world of Hollywood—as a beautiful and successful lounge singer. Just as she's about to ride off into the L.A. sunset, the past comes back with a vengeance, threatening to crush Davie's dreams—and break her heart again. With wholly original characters and a cinematic storyline, 32 Candles introduces Ernessa T. Carter, a new voice in fiction with smarts, attitude, and sassiness to spare.

Sweet and Low is the amazing, bittersweet, hilarious story of an American family and its patriarch, a

short-order cook named Ben Eisenstadt who, in the years after World War II, invented the sugar packet and Sweet 'N Low, converting his Brooklyn cafeteria into a factory and amassing the great fortune that would destroy his family. It is also the story of immigrants to the New World, sugar, saccharine, obesity, and the health and diet craze, played out across countries and generations but also within the life of a single family, as the fortune and the factory passed from generation to generation. The author, Rich Cohen, a grandson (disinherited, and thus set free, along with his mother and siblings), has sought the truth of this rancorous, colorful history, mining thousands of pages of court documents accumulated in the long and sometimes corrupt life of the factor, and conducting interviews with members of his extended family. Along the way, the forty-year family battle over the fortune moves into its titanic phase, with the money and legacy up for grabs. Sweet and Low is the story of this struggle, a strange comic farce of machinations and double dealings, and of an extraordinary family and its fight for the American dream.

For over 200 years, scholars have been debating, analyzing and exploring one of the most important books ever written—The Bible—and overturning much of what we know about this sacred library of books. However, a large group of people who actually use this book, mainly lay Christians, aren't aware of this larger, deeper conversation. It is for these people that Spong writes *Re-Claiming the Bible for a Non-Religious World*, a primer on the history and significance of the Bible. In this informal and accessible survey, Spong moves book by book through the Scriptures, introducing their themes and messages by examining the sweep of history in which these books were originally written. What has history taught us? How should we read these stories today? What does it mean for how we live our lives? And why do people tenaciously hold on to so many myths associated with The Bible? There is a vast audience of religiously hungry people eager to explore a meaningful journey into the Bible, and Spong is leading the way with this book.

Introducing Wyoming's Sheriff Walt Longmire in this riveting novel from the New York Times bestselling author of *Hell Is Empty* and *As the Crow Flies*, the first in the Longmire Mystery Series, the basis for *LONGMIRE*, the hit Netflix original drama series. Fans of Ace Atkins, Nevada Barr and Robert B. Parker will love this outstanding first novel, in which New York Times bestselling author Craig Johnson introduces Sheriff Walt Longmire of Wyoming's Absaroka County. Johnson draws on his deep attachment to the American West to produce a literary mystery of stunning authenticity, and full of memorable characters. After twenty-five years as sheriff of Absaroka County, Walt Longmire's hopes of finishing

out his tenure in peace are dashed when Cody Pritchard is found dead near the Northern Cheyenne Reservation. Two years earlier, Cody has been one of four high school boys given suspended sentences for raping a local Cheyenne girl. Somebody, it would seem, is seeking vengeance, and Longmire might be the only thing standing between the three remaining boys and a Sharps .45-70 rifle. With lifelong friend Henry Standing Bear, Deputy Victoria Moretti, and a cast of characters both tragic and humorous enough to fill in the vast emptiness of the high plains, Walt Longmire attempts to see that revenge, a dish best served cold, is never served at all.

Clusters and Clustering is a popular form of distributed computing that ties together several UNIX machines which allow them to provide greater availability and flexibility of information. This text introduces Hewlett-Packard's Cluster architecture, known as the High Availability Cluster. Assuming no prior knowledge of Clusters, the book provides an accessible introduction to the terminology, issues, architectures, and solutions for building high availability systems and clusters. The hardware and software technologies and the costs associated with each are explained, and a discussion of what is involved is also provided.

The subject of this book is politics and religion, the relationship between Constantine and Christianity. Something happened in the reign of the Emperor Constantine that transformed both politics and religion in Europe, and anyone who seeks to understand modern Christianity must analyze this transformation and its consequences. The reign of Constantine is remembered as the victory of Christianity over the Roman Empire; the subtitle of the book indicates a more ominous assessment: "the triumph of ideology." Through a careful analysis of the sources, Dr. Kee argues that Constantine was not in fact a Christian and that the sign in which he conquered was not the cross of Christ but a political symbol of his own making. However, that is only the beginning of the story. For Constantine, religion was part of an imperial strategy, and the second part of this book shows just what that strategy was. Here is the development which marks a transition to a further stage, the way in which by using Christianity for his own ends, Constantine transformed it into something completely different.

Constantine, Dr. Kee argues, along with his biographer and panegyrist Eusebius, succeeded in replacing the norms of Christ and the early church with the norms of imperial ideology. Why it has been previously thought that Constantine was a Christian is not because what he believed was Christian, but because what he believed came to be called Christian. And that represents ""the triumph of ideology.""

Anita Lahey's second collection, *Spinning Side Kick*, is a hard-knuckled look at the other half. These lively poems mix a girl-about-town cockiness with an all-too-rare emotional honesty about men, love, and relationships. Whether the subject is a one-man chimney demolition, the lifelong fidelity of seahorses, a lover at war in Afghanistan or a kickboxing match, Lahey confronts the enduring disconnect between the sexes in a language that is slangy and quick, punctuated with jabs. She eyes those moments—in a day, in a life—when the normal clues we rely on disappear, shifting the line between domesticity and danger. In *Spinning Side Kick*, a talented poet returns with sharper aim.

World events in recent years have led observers, particularly since late 2013, to conclude that the international security environment in recent years has undergone a shift from the post-Cold War era that began in the late 1980s and early 1990s, also sometimes known as the unipolar moment (with the United States as the unipolar power), to a new and different situation that features, among other things, renewed great power competition with China and Russia and challenges by these two countries and others to elements of the U.S.-led international order that has operated since World War II. The shift in the international security environment has become a major factor in the debate over future U.S. defense spending levels, and has led to new or renewed emphasis on the following in discussions of U.S. defense strategy, plans, and programs: grand strategy and geopolitics as part of the context for discussing U.S. defense budgets, plans, and programs; U.S. and NATO military capabilities in Europe; capabilities for countering so-called hybrid warfare and gray-zone tactics employed by countries such as Russia and China; capabilities for conducting so-called high-end warfare (i.e., large-scale, high-intensity, technologically sophisticated warfare) against countries such as China and Russia; maintaining U.S. technological superiority in conventional weapons; nuclear weapons and nuclear deterrence; speed of weapon system development and deployment as a measure of merit in defense acquisition policy; and minimizing reliance in U.S. military systems on components and materials from Russia and China.
