Subnetting - Networking Questions and Answers

With that given information, answer C

(192.168.1.128-255/25) and answer F (192.168.1.0-3/30) best fit the scenario.

Answers A, D, and E are incorrect because these are invalid subnet addresses.

Answer B is incorrect because the /26 mask will only provide 64 IP addresses, which is not sufficient for the size of Network A.

Explanation in smaller IP networks. In Subnetting we create multiple small manageable networks from a single large IP network. Let's take an example. To best utilize available addresses if we put more than 16000000 hosts in a single network, due to broadcast and collision, that network will never work.
