possible. This book explores the themes underlying ancient mythology, philosophy, and religion. Unrivaled in its beauty and completeness, it distills ancient and modern teachings of nearly 600 experts.

An extraordinary new novel from Jasmine Warga, Newbery Honor-winning author of *Other Words for Home*, about loss and healing—and how friendship can be magical. Cora hasn't spoken to her best friend, Quinn, in a year. Despite living next door to each other, they exist in separate worlds of grief. Cora is still grappling with the death of her beloved sister in a school shooting, and Quinn is carrying the guilt of what her brother did. On the day of Cora's twelfth birthday, Quinn leaves a box on her doorstep with a note. She has

decided that the only way to fix things is to go back in time to the moment before her brother changed all their lives forever—and stop him. In spite of herself, Cora wants to believe. And so the two former friends begin working together to open a wormhole in the fabric of the universe. But as they attempt to unravel the mysteries of time travel to save their siblings, they learn that the magic of their friendship may actually be the key to saving themselves. *The Shape of Thunder* is a deeply moving story, told with exceptional grace, about friendship and loss—and how believing in impossible things can help us heal.

An oracular Surrealism: the debut presentation of Leonora Carrington's recently discovered tarot deck *The British-born*

artist Leonora Carrington is one of the more fascinating figures to emerge from the Surrealist movement. As both a writer and painter, she was championed early by André Breton and joined the exiled Surrealists in New York, before settling in Mexico in 1943. The magical themes of Carrington's otherworldly paintings are well known, but the recent discovery of a suite of tarot designs she created for the Major Arcana was a revelation for scholars and fans of Carrington alike. Drawing inspiration from the Tarot of Marseille and the popular Waite-Smith deck, Carrington brings her own approach and style to this timeless subject, creating a series of iconic images. Executed on thick board, brightly colored and squarish in format, Carrington's Major Arcana shines with gold and silver leaf, exploring tarot

themes through what Gabriel Weisz Carrington describes as a "surrealist object." This tantalizing discovery, made by the curator Tere Arcq and scholar Susan Aberth, has placed greater emphasis upon the role of the tarot in Carrington's creative life and has led to fresh research in this area. The Tarot of Leonora Carrington is the first book dedicated to this important aspect of the artist's work. It includes a full-size facsimile of her newly discovered Major Arcana; an introduction from her son, Gabriel Weisz Carrington; and a richly illustrated essay from Tere Arcq and Susan Aberth that offers new insights--exploring the significance of tarot imagery within Carrington's wider work, her many inspirations and mysterious occult sources. Leonora Carrington (1917-2011) was born in Lancashire, England. In

1936, she saw Max Ernst's work at the International Surrealist Exhibition in London, and met the artist the following year. They became a couple almost immediately. When the outbreak of World War II separated them, Carrington fled to Spain, then Lisbon, where she married Renato Leduc, a Mexican diplomat, and escaped to Mexico, where she became close with Remedios Varo and other expat Surrealists.

How our collective intelligence has helped us to evolve and prosper Humans are a puzzling species. On the one hand, we struggle to survive on our own in the wild, often failing to overcome even basic challenges, like obtaining food, building shelters, or avoiding predators. On the other hand, human

groups have produced ingenious technologies, sophisticated languages, and complex institutions that have permitted us to successfully expand into a vast range of diverse environments. What has enabled us to dominate the globe, more than any other species, while remaining virtually helpless as lone individuals? This book shows that the secret of our success lies not in our innate intelligence, but in our collective brains—on the ability of human groups to socially interconnect and learn from one another over generations. Drawing insights from lost European explorers, clever chimpanzees, mobile hunter-gatherers, neuroscientific findings, ancient bones, and the human genome, Joseph Henrich demonstrates how our collective brains have propelled our species' genetic evolution and shaped our

biology. Our early capacities for learning from others produced many cultural innovations, such as fire, cooking, water containers, plant knowledge, and projectile weapons, which in turn drove the expansion of our brains and altered our physiology, anatomy, and psychology in crucial ways. Later on, some collective brains generated and recombined powerful concepts, such as the lever, wheel, screw, and writing, while also creating the institutions that continue to alter our motivations and perceptions. Henrich shows how our genetics and biology are inextricably interwoven with cultural evolution, and how culture-gene interactions launched our species on an extraordinary evolutionary trajectory. Tracking clues from our ancient past to the present, *The Secret of Our Success* explores how the

evolution of both our cultural and social natures produce a collective intelligence that explains both our species' immense success and the origins of human uniqueness.

In the 13th century, over a few decades, a huge literature emerged around an unlikely tale. Survivors of the core of early Christianity make a perilous journey to Western Europe. They begin a hidden bloodline, preserve immensely powerful relics of the crucifixion, and carry a secret which, if revealed, would turn the established church on its head. A.E. Waite gets to the core of the Grail legend, an interwoven mass of narratives which started with seeds of pagan folklore and grew into a massive allegorical Christian epic.

The Black Swan is a standalone book in Nassim Nicholas Taleb ' s landmark *Incerto* series, an investigation of opacity, luck, uncertainty, probability, human error, risk, and decision-making in a world we don ' t understand. The other books in

the series are Fooled by Randomness, Antifragile, and The Bed of Procrustes. A black swan is a highly improbable event with three principal characteristics: It is unpredictable; it carries a massive impact; and, after the fact, we concoct an explanation that makes it appear less random, and more predictable, than it was. The astonishing success of Google was a black swan; so was 9/11. For Nassim Nicholas Taleb, black swans underlie almost everything about our world, from the rise of religions to events in our own personal lives. Why do we not acknowledge the phenomenon of black swans until after they occur? Part of the answer, according to Taleb, is that humans are hardwired to learn specifics when they should be focused on generalities. We concentrate on things we already know and time and time again fail to

take into consideration what we don ' t know. We are, therefore, unable to truly estimate opportunities, too vulnerable to the impulse to simplify, narrate, and categorize, and not open enough to rewarding those who can imagine the " impossible. " For years, Taleb has studied how we fool ourselves into thinking we know more than we actually do. We restrict our thinking to the irrelevant and inconsequential, while large events continue to surprise us and shape our world. In this revelatory book, Taleb explains everything we know about what we don ' t know, and this second edition features a new philosophical and empirical essay, " On Robustness and Fragility, " which offers tools to navigate and exploit a Black Swan world. Elegant, startling, and universal in its applications, The Black Swan will change

the way you look at the world. Taleb is a vastly entertaining writer, with wit, irreverence, and unusual stories to tell. He has a polymathic command of subjects ranging from cognitive science to business to probability theory. The Black Swan is a landmark book—*itself a black swan*.
